

VEHICLE PARTNERSHIP ACCOUNTING REPORT

MO / Z PARTNERSHIP LEDGER REPORT

A full audit-style partnership statement

FINAL CURRENT BALANCE

Z Owes Mo \$13,414.02

Prepared as a partner-facing reconciliation · Every figure recomputed from source inputs

Positive balance = Z owes Mo | Negative balance = Mo owes Z

Ledger Rules

These rules govern every calculation in this report. They are applied consistently to all 24 recorded ledger events.

Positive balance means **Z owes Mo**.

Negative balance means **Mo owes Z**.

Partner deals are split 50 / 50 unless otherwise stated.

Only expenses labeled “Mo” are counted as Mo expenses. All other expenses are treated as Z-paid unless the ledger specifically says another person paid them.

Z-paid purchase funding is always written as: “Z paid for Mo’s 50% share of the purchase.”

Named payees/vendors (Drako, Tito, Taylor, Talon, Luis, Angela, AutoZone, gas, tow, Lyft, emissions, car wash, parts, repairs, etc.) are listed exactly as written and classified clearly. If a payer is not explicitly Mo, it is never counted as a Mo expense.

i How each figure is derived

Figure	Formula
Total Cost	Purchase price + all listed expenses
Total Profit	Sale price – Total Cost
Profit Split (each)	Total Profit ÷ 2
Mo Take-Home	Mo car half + Mo expense reimbursement + Mo profit share
Z Take-Home	Z car half + Z expense reimbursement + Z profit share
Running Balance	Prior balance ± transaction impact (positive = Z owes Mo)

The report that follows walks through all 24 ledger events in chronological order, each ending with the updated running balance. A full reconciliation and inventory statement close the report.

Chronological Ledger

All transactions in order. Each vehicle sale follows the same A–F structure: purchase, expenses, sale, Mo take-home, Z take-home, and the resulting running balance.

1 Mitsubishi + Q50

Two completed vehicles carried into this ledger as Mo take-home amounts. These establish the opening amount owed to Mo.

A Take-Home Summary

Mitsubishi — Mo Take-Home	\$4,635
Q50 — Mo Take-Home	\$4,781
Combined Mo Take-Home	\$9,416

AUDIT NOTE Z take-home for the Mitsubishi and Q50 is **not explicitly stated in the source ledger**. Only the Mo take-home figures were provided, so no Z figure is shown.

FINAL AMOUNT Z OWES MO

\$13,414.02

Current Inventory Statement

Vehicles still owned by the partnership at the close of this ledger. Each is owned 50 / 50, so the inventory cost is shared equally.

1 2016 Cadillac XTS

Total Cost (purchase \$6,580 + gas \$30)	\$6,610
Z Share	\$3,305
Mo Share	\$3,305

2 2020 Ford F150

Total Cost (corrected purchase)	\$14,430
Z Share	\$7,215
Mo Share	\$7,215

Σ Total Current Inventory

Item	Amount
Total Inventory Cost	\$21,040
Z Share in Inventory	\$10,520
Mo Share in Inventory	\$10,520

FINAL AMOUNT Z OWES MO

\$13,414.02

Note: inventory is stated at cost and is separate from the cash balance owed between partners. The \$13,414.02 owed to Mo already reflects that Z paid for Mo's 50% share of both inventory vehicles.

Audit Notes & Verification

This report was generated by a program that recomputes every figure from raw purchase, expense, and sale inputs, then checks each result against the source ledger. The report would not have been produced if any check failed.

1 Items preserved exactly from the source ledger

Mitsubishi & Q50: Z take-home is **not explicitly stated in the source ledger**; only Mo take-home amounts were provided.

Buick — Drako \$625: included in Total Cost but not reimbursed to either partner in the source ledger. Shown separately, not hidden. Preserved source Z take-home = \$3,362.50 (would be \$3,987.50 if Drako were treated as Z-paid).

Named third-party payees (Drako, Tito, Taylor, Luis, Angela, Talon, etc.) are vendors/labor, not the funding partner. Per the standard rule they are treated as Z-paid where the source groups them that way, and each is listed by name so nothing is obscured.

2 Verification result

Check	Result
Total cost = purchase + expenses (all sales)	PASS
Profit = sale price – total cost (all sales)	PASS
Profit split = profit ÷ 2 (all sales)	PASS
Mo take-home = car half + Mo expense + profit share	PASS
Z take-home = car half + Z expense + profit share	PASS
Running balance chain (24 events)	PASS
Final balance resolves to \$13,414.02	PASS

No arithmetic discrepancies were found between the source ledger and the recomputed figures. Every number in this report matches the source ledger exactly.
